

4MP 37X Starlight IR Network PTZ Camera

TD-8843IM (PE/WP/37M/VL50) TD-8843IM(PE/37M/VL50)

System

TD-8843IM(PE/37M/VL50) which adopts 1/1.8" progressive CMOS sensor, 37x optical zoom lens and accurate gimbal, could monitor wide open area with great details, such as rivers, forests, roads, railways, airports, ports, squares, parks, scenic spots, stations and large venues. It can recognize human faces or car license plate at 557m away or detect human body at 2.6km away. This model adopts an advanced zoomed VCSEL illuminator, synchronously match lens angle and illumination beam, which improves human face detection range to 500m at night, and brings more uniform and transparent B/W image. Even in the near complete darkness, this illuminator could light up human faces at 500m away. This camera adopts the latest ISP, which delivers excellent picture quality. At most time, the camera outputs vivid colorful image without necessary of switching to B/W mode. It supports facial priority, car lamp priority exposure, auto-gain control for better VCA results. 1.0T CNN deep-learning engine supports faces/vehicle detection &classification, perimeter precaution and auto-tracking functions.

With full metal shield, built-in heater and cool fan, it even could cold start at -40°C; due to its IP67 Ingress Protection rating and Ik10 impact test, 6KV lightning rating, this product could work well in harsh weather, such as islands, desert areas, ice-plain, and so on. TD-8843IM (PE/WP/37M/VL50) is enhanced with an additional electric rain-wiper. The camera conforms to the ONVIF specifications, ensuring interoperability between network video products regardless of manufacturer.
